

FASTCAM SA-Z

HIGH PERFORMANCE HIGH-SPEED CAMERA SYSTEM

The Photron FASTCAM SA-Z offers scientists, researchers and engineers the ability to capture high resolution digital images at ultra-high speeds to see and understand previously invisible processes and events. Using Photron's proprietary CMOS image sensor technology, FASTCAM SA-Z combines high recording rates with outstanding light sensitivity and excellent image quality to provide the most versatile ultra-high speed digital camera available today.

The ultra-high speed FASTCAM SA-Z provides mega pixel resolution to a blistering 21,000 frames per second (fps) from its very light sensitive (ISO 25,000) 20 μm square pixels, with 12-bit pixel depth (ADC) delivering incredible image quality. The FASTCAM SA-Z can operate at reduced resolution beyond two million frames per second.

A global electronic shutter, 1 μs standard, but capable of operating down as fast as 159 nanoseconds (export restrictions apply) ensures the 12-bit monochrome, 36-bit color images are crystal clear and blur free as you have come to expect from Photron high speed imaging products.

The square image format is ideal for any application requiring recording through a round or square viewing ports, such as combustion research, and has the added benefit of enabling users to rotate their camera if required without having to sacrifice horizontal resolution as is required when a camera with a rectangular aspect ratio is mounted on its side. Tools within Photron's PFV camera control / replay/ editing software allow the displayed image to be rotated to reflect the true view.

Target applications include:

- Materials Science
- Combustion Research
- Fluid dynamics (PIV)
- Ballistic Imaging
- Defense and aerospace research
- Plasma and arc studies
- Shock Waves and Detonation

Benefits

- Powerful performance with many usable resolution and speed combinations, including:
 - 20,000 fps at 1,024 x 1,024 pixels resolution
 - 40,000 fps at 1,024 x 512 pixel resolution
 - 100,000 fps at 640 x 280 pixel resolution
 - 200,000 fps at 384 x 176 pixel resolution
- Reduced resolution operation to over 2M frames per second
- Market leading light sensitivity (ISO Ssat 12232 standard)
 - ISO 25,000 monochrome
 - ISO 10,000 color
- Global electronic shutter as fast as 159ns (dependant on frame rate selected), freezing the fastest motion without blur
- Two SD card slots and dual Gigabit Ethernet ports enable easy and very fast image off load
- Available with four onboard memory options:
8GB, 16GB, 32GB, 64GB

Model 2100K subject to export license control restrictions where applicable

Sensor	20 μm pixel size, 12-bit ADC (Bayer system color, single sensor)	Trigger Delay	Programmable delay on selected input and output triggers, 100ns resolution
Shutter	Global electronic shutter from 1ms to 1 μs independent of frame rate (sub-microsecond shutter available subject to export license control)	Timing	Internal clock or external source
Lens Mount	Interchangeable Nikon F-mount (compatible with Nikon G type lenses), C-mount using supplied adapters. Optional Canon EF remote control mount	Phase Lock	Enables cameras to synchronize precisely to a master camera or external signal source
Extended Dynamic Range	Selectable in twenty steps (0 to 99% in 5% increments) to prevent pixel over-exposure	Event Markers	Ten user specified event markers indicate specific events within an image sequence in real time. Immediately accessible through software
Memory	8GB (standard: 5,455 frames @ maximum resolution) 16GB (option: 10,916 frames @ maximum resolution) 32GB (option: 21,839 frames @ maximum resolution) 64GB (option: 43,684 frames @ maximum resolution)	Trigger Modes	Start, End, Center, Manual, Random, Random Reset, Random Center, Random Manual
Recording bit depth	Selectable 8-bit or 12-bit recording	Saved Image Formats	JPEG, AVI, TIFF, BMP, RAW, RAWW, MRAW PNG, MOV and FTIF. Images can be saved with or without image or comment data
Video Output	Live and playback video through Two HD-SDI or Dual RS-170 (NTSC/PAL) outputs	Data Display	Frame Rate, Shutter Speed, Trigger Mode, Date or Time, Status (Playback/Record), Real Time, Frame Count and Resolution
Nonvolatile Data Storage	2x SD/SDHC/SDXC memory Card drives provided. Compatible with UHS-I (SDR104)	Partitioning	Up to 64 memory segments for capturing multiple recordings into camera memory
Camera Control	Remote computer control via high-speed dual port Gigabit Ethernet or optional local control via handheld keypad with LCD monitor	Data Acquisition	Supports Photron and National Instruments DAQ options
User Preset Switches	Four user schedulable camera function controls mounted on the camera's rear panel	Operating Temperature	0 - 45 degrees
Low Light Mode	Low light mode drops the frame rate and shutter time to their maximum values, while maintaining other set parameters, to enable users to position and focus the camera	Mounting	3 x 1/4-20 UNC, 3 x 3/8-16 UNC
Triggering	Selectable positive or negative TTL or switch closure	Dimensions	261mm (10.2")H x 150mm (5.9")W x 375mm (14.7")D ^{*excluding protrusions}
		Weight	10.4 kg (22.93 lbs) ^{*excluding protrusions}
		Power Requirements	100V-240V AC 50-60Hz DC operation 20-36 VDC, 230VA
